

## ➤ Example 1: Flat File Vessel/Pipeline Operator Data for Pipeline A Company

This example illustrates the movement of reportable products by Pipeline A Company. The pipeline moves product from Terminal 1 to Terminal 2 and on to Terminal 3, which is located outside the state. Product movements include gasoline (Product Code 065), diesel fuel (Product Code 167), jet fuel (Product Code 130) and kerosene (Product Code 073). The pipeline also serves a user (Electric Company or Airport on diagram shown on page 2) with a direct connection to the pipeline. The user does not require registration as a terminal operator because the user's facility does not have a terminal rack.

In the example below, each numbered line represents a line in the report. Each “<tab>” represents a tab delimiter and the “<cr>” represents the carriage return needed to get to the next line. The actual file, unlike the Flat File example below, would not contain Record Type headers, line numbers, explanatory notes or lines between Record Types (transactions).

## ➤ Example 2: Flat File Vessel/Pipeline Operator Report Data for Pipeline B Company

This example illustrates the movement of reportable products by Pipeline B Company. The pipeline moves product from refinery storage to Terminal 2. Pipeline B only moves gasoline (Product Code 065).

In the example below, each numbered line represents a line in the report. Each “<tab>” represents a tab delimiter and the “<cr>” represents the carriage return needed to get to the next line. The actual file, unlike the Flat File example below, would not contain Record Type headers, line numbers, explanatory notes or lines between Record Types (transactions).
